“Our purpose in writing is to share with our complete satisfaction with the process reengineering your company designed and implemented for our business office.

CD-COM’s solution creating a web based repository was the correct answer. The scanning and indexing of each claim residing on the EOB made for a fast and efficient method for our specialists to locate a claim examine it for correct payment(s) and answer queries from either the patient or the insurance company. CD-COM’s method is so fast we’ve not added additional staff to support the process. Over the past three years our business has grown over 30% in practicing physicians and we still achieved the additional goal of maintaining high service level standards.

We highly recommend CD-COM Systems Midwest Inc. for any document management challenge an organization might have.”

Ron Barrett
Administrator, Otolaryngology Associates LLC
